

C-PRO MICRO Programmable and application-oriented controllers

GB ENGLISH
1 GETTING STARTED
1.1 Important

Read these instructions carefully before installing and using the instrument and follow all additional information for installation and electrical connection; keep these instructions close to the instrument for future consultations.

The instrument must be disposed according to the local legislation about the collection for electrical and electronic equipment.

2 INTRODUCTION
2.1 Introduction

C-PRO MICRO is a family of programmable or application-oriented controllers.

The family is made of the following models:

- CPU1D0* - built-in controller with display for applications in refrigeration field (look at the following drawing)

- CPU1D1* - built-in controller with display for applications in conditioning field (look at the following drawing)

- CPU1S0* - blind controller (to be used with the user interface V LEDi or V WALL)
- CPU1B0* - blind open frame controller (to be used with the user interface V LEDi or V WALL).

The controllers have the following kind of inputs and outputs:

- 4 analog inputs
- 5 digital inputs
- 1 output for cut phase module EVDFAN1
- 2 analog outputs (by request, not available in the open frame models)
- 6 digital outputs.

There are mainly two versions of controllers, according to the kind of supported BUS:

- IntraBUS version
- CANBUS version.

Through the expansions belonging to the family C-PRO EXP MICRO it is possible to increase the I/O.

The programmable versions can be programmed with the development ambient UNI-PRO.

For further information consult the Hardware manual of C-PRO MICRO, the Software manual of UNI-PRO and the Application manual.

3 SIZE AND INSTALLATION
3.1 Size built-in models

4 DIN modules; size in mm (in).

3.2 Size blind models

4 DIN modules; size in mm (in).

3.3 Size open frame models

4 DIN modules; size in mm (in).

Connector 1: digital outputs.
Connector 2: serial port to:

- program the controller
- communicate with the supervision system
- communicate with the programming key.

The port must not be used at the same time for the same purposes.

Connector 3: analog outputs (by request, not available in the open frame models).

The following combinations are available:

- one 4-20 mA analog output and one 0-10 V analog output.

PIN	MEANING
AO2	analog output 2 (0-10 V)
GND	common analog outputs
AO3	analog output 3 (4-20 mA)

- two 4-20 mA analog outputs.

PIN	MEANING
AO2	analog output 2 (4-20 mA)
GND	common analog outputs
AO3	analog output 3 (4-20 mA)

- two 0-10 V analog outputs.

PIN	MEANING
AO2	analog output 2 (0-10 V)
GND	common analog outputs
AO3	analog output 3 (0-10 V)

Connector 4: power supply controller, analog inputs, digital inputs and output cut phase module.

PIN	MEANING
1	power supply controller (12 VAC/DC)
2	power supply ratiometric transducers (5 VDC)
3	common analog and digital inputs
4	common analog and digital inputs
5	analog input 4 (NTC probe, 0-20 mA current transducer, 4-20 mA current transducer or 0-5 V ratiometric transducer)
6	analog input 3 (NTC probe, 0-20 mA current transducer, 4-20 mA current transducer or 0-5 V ratiometric transducer)
7	analog input 2 (NTC probe)
8	analog input 1 (NTC probe)
9	power supply controller (12 VAC/DC)
10	power supply current transducers and cut phase module (12 VDC)
11	output cut phase module (analog output 1)
12	digital input 5
13	digital input 4
14	digital input 3
15	digital input 2
16	digital input 1

To use the cut phase module EVDFAN1, the controller must be supplied with alternate current; the phase supplying the controller must be the same supplying the module.

Connector 5: serial port to:

- communicate with the expansion
 - communicate with the user interface.
- IntraBUS versions:
- | PIN | MEANING |
|------|-----------------------|
| VDC | power supply (12 VDC) |
| GND | common |
| DATA | signal |
- CANBUS versions:
- | PIN | MEANING |
|-----|----------|
| + | signal + |
| GND | ground |
| - | signal - |

The power supply of the controller and the one of the expansion must be galvanically insulated each other.

4 ELECTRICAL CONNECTION
4.1 Electrical connection

5 TECHNICAL DATA
5.1 Technical data
Box: self-extinguishing grey.

Size: 70.0 x 151.0 x 38.0 mm (2.755 x 5.944 x 1.496 in) the open frame models, 70.0 x 158.0 x 61.0 mm (2.755 x 6.220 x 2.401 in) otherwise; 4 DIN modules.

Size refers to the controller with all the connectors properly plugged.

Installation: on DIN rail.

Frontal protection: IP 00 the open frame models, IP40 otherwise.

Connections: 5 connectors; with reference to the drawings of chapter 4:

- connector 1: 9+2 poles male terminal blocks pitch 5.0 mm (0.196 in); screw terminal blocks in the open frame models
- connector 2: 6 poles Micromatch connector
- connector 3: 3 poles male terminal block pitch 5.0 mm (0.196 in); by request, not available in the open frame models
- connector 4: 16 poles male Minifit connector
- connector 5: 3 poles male terminal block pitch 5.0 mm (0.196 in); screw terminal block in the open frame models.

The maximum lengths of the connecting cables are the following:

- power supply: 1 m (3.280 ft)
- analog inputs: 3 m (9.842 ft)
- digital inputs: 3 m (9.842 ft)
- analog outputs: 3 m (9.842 ft)
- digital outputs: 3 m (9.842 ft)
- output cut phase module: 1 m (3.280 ft)
- expansion (IntraBUS versions): 1 m (3.280 ft)
- expansion (CANBUS versions):

- 1,000 m (3,280 ft) with baud rate 20,000 baud
- 500 m (1,640 ft) with baud rate 50,000 baud
- 250 m (820 ft) with baud rate 125,000 baud
- 50 m (164 ft) with baud rate 500,000 baud

- user interface (IntraBUS versions): 1 m (3.280 ft) if the user interface is supplied by the controller, 30 m (98.425 ft, only the model V WALL) if the user interface has an independent power supply
- user interface (CANBUS versions):

- 1,000 m (3,280 ft) with baud rate 20,000 baud
- 500 m (1,640 ft) with baud rate 50,000 baud
- 250 m (820 ft) with baud rate 125,000 baud
- 50 m (164 ft) with baud rate 500,000 baud.

One suggests using the following connecting kits (the kits are not supplied with the controller):

- for connectors 1 and 5, the connecting kit CJAV08 (9+2 + 3 poles female terminal blocks pitch 5.0 mm, 0.196 in)
- for connectors 1, 3 and 5, the connecting kit CJAV09 (9+2 + 3 + 3 poles female terminal blocks pitch 5.0 mm, 0.196 in)
- for connector 4, the connecting kit 0065300060 (16 poles female Minifit connector wired on cables 1 m, 3.280 ft long).

Working temperature: from 0 to 50 °C (32 to 120 °F, 10 ... 90% of relative humidity without condensate).

Power supply: 12 VAC/DC, 50/60 Hz, 6 VA (approximate).

Analog inputs: 4 inputs:

- 2 for NTC probes
- 2 for NTC probes/0-20 mA current transducers/4-20 mA current transducers/0-5 V ratiometric transducers.

Digital inputs: 5 inputs for NO/NC contact (free of voltage).

Working range: from -40.0 to 100.0 °C (40.0 to 210.0 °F) for NTC probe.

Analog outputs: 2 outputs (by request, not available in the open frame models).

The following combinations are available:

- one 4-20 mA analog output and one 0-10 V analog output
- two 4-20 mA analog outputs
- two 0-10 V analog outputs.

Digital outputs: six 5 res. A @ 250 VAC outputs (relays, NO contact).

With reference to connector 1 of the drawings of chapter 4:

- the maximum current allowed on terminals 2, 4, 6 and 12 is 3 A
- the maximum current allowed on terminal 8 is 4 A.

Further outputs: 1 output for cut phase module EVDFAN1.

Serial ports: 2 ports:

- 1 port to:
 - program the controller
 - communicate with the supervision system RICS (through a serial interface, via TTL, with MODBUS communication protocol)
 - communicate with the programming key EVKEY
- 1 non optoisolated port to:
 - communicate with the expansion
 - communicate with the user interface.

Program memory: 128 KB (FLASH memory).

Data memory: 4 KB (RAM memory).

Parameter data memory: 4 KB (EEPROM memory).

I ITALIANO
1 IMPORTANTE
1.1 Importante

Leggere attentamente queste istruzioni prima dell'installazione e prima dell'uso e seguire tutte le avvertenze per l'installazione e per il collegamento elettrico; conservare queste istruzioni con lo strumento per consultazioni future.

Installazione:

on DIN rail.

Frontal protection:

IP 00 the open frame models, IP40 otherwise.

Connections:

5 connectors; with reference to the drawings of chapter 4:

- connector 1: 9+2 poles male terminal blocks pitch 5.0 mm (0.196 in); screw terminal blocks in the open frame models

- connettore 4: connettore Minifit maschio 16 vie
- connettore 5: morsettiera maschio 3 vie passo 5,0 mm (0,196 in); morsettiera a vite nei modelli a giorno.
- Le lunghezze massime dei cavi di collegamento sono le seguenti:
- alimentazione: 1 m (3,280 ft)
- ingressi analogici: 3 m (9,842 ft)
- ingressi digitali: 3 m (9,842 ft)
- uscite analogiche: 3 m (9,842 ft)
- uscite digitali: 3 m (9,842 ft)
- uscita modulo taglio di fase: 1 m (3,280 ft)
- espansione (versioni IntraBUS): 1 m (3,280 ft)
- espansione (versioni CANBUS):
- 1.000 m (3.280 ft) con baud rate 20.000 baud
- 500 m (1.640 ft) con baud rate 50.000 baud
- 250 m (820 ft) con baud rate 125.000 baud
- 50 m (164 ft) con baud rate 500.000 baud
- interfaccia utente (versioni IntraBUS): 1 m (3,280 ft) se l'interfaccia utente è alimentata dal controllore, 30 m (98,425 ft, solo il modello V WALL) se l'interfaccia utente dispone di alimentazione autonoma
- interfaccia utente (versioni CANBUS):
- 1.000 m (3.280 ft) con baud rate 20.000 baud
- 500 m (1.640 ft) con baud rate 50.000 baud
- 250 m (820 ft) con baud rate 125.000 baud
- 50 m (164 ft) con baud rate 500.000 baud.

Si consiglia di utilizzare i seguenti kit di cablaggio (i kit non sono in dotazione con il controllore):

- per i connettori 1 e 5, il kit di cablaggio CJAV08 (morsettiera femmina 9 + 2 + 3 vie passo 5,0 mm, 0,196 in)
- per i connettori 1, 3 e 5, il kit di cablaggio CJAV09 (morsettiera femmina 9 + 2 + 3 + 3 vie passo 5,0 mm, 0,196 in)
- per il connettore 4, il kit di cablaggio 0065300060 (connettore Minifit femmina 16 vie cablato su cavi di lunghezza 1 m, 3,280 ft).

Temperatura di impiego: da 0 a 50 °C (da 32 a 120 °F, 10 ... 90% di umidità relativa senza condensa).

Alimentazione: 12 VCA/CC, 50/60 Hz, 6 VA (approssimativi).

Ingressi analogici: 4 ingressi:

- 2 per sonde NTC
- 2 per sonde NTC/trasduttori di corrente 0-20 mA/trasduttori di corrente 4-20 mA/trasduttori raziometrici 0-5 V.

Ingressi digitali: 5 ingressi per contatto NO/NC (contatto pulito).

Campo di misura: da -40,0 a 100,0 °C (da -40,0 a 210,0 °F) per sonda NTC.

Uscite analogiche: 2 uscite (su richiesta, non disponibili nei modelli a giorno).

Sono disponibili le seguenti combinazioni:

- 1 uscita analogica 4-20 mA e 1 uscita analogica 0-10 V
- 2 uscite analogiche 4-20 mA
- 2 uscite analogiche 0-10 V.

Uscite digitali: 6 uscite (relè) da 5 A res. @ 250 VCA (contatto NA).

Con riferimento al connettore 1 dei disegni del capitolo 4:

• la corrente massima consentita sui terminali 2, 4, 6 e 12 è di 3 A

• la corrente massima consentita sul terminale 8 è di 4 A.

Altre uscite: 1 uscita per modulo taglio di fase EVDFAN1.

Porte seriali: 2 porte:

- 1 porta per:
 - la programmazione del controllore
 - la comunicazione con il sistema di supervisione RICS (attraverso un'interfaccia seriale, via TTL, con protocollo di comunicazione MODBUS)
 - la comunicazione con la chiave di programmazione EVKEY
 - 1 porta non optoisolata per:
 - la comunicazione con l'espansione
 - la comunicazione con l'interfaccia utente.

Memoria programma: 128 KB (memoria FLASH).

Memoria dati: 4 KB (memoria RAM).

Memoria dati parametri: 4 KB (memoria EEPROM).
