and screw brackets (on the right-hand side, by request); if you are using screw brack-

ets, you have to moderate the clamping torque, in order not to damage the box and

screw brackets

OPERATION 2

2.1 Preliminary information

During the normal operation the instrument shows the room

temperature.

3

press

press

press

2.2 How to silence the buzzer

If you have to silence the buzzer (optional):

• press 🕢

WORKING SETPOINT

3.1 How to set the working setpoint

If you have to modify the first working setpoint value:

- set within 2 s 💦 (3) (4)
- (↑) or (↓) press
- do not operate for 2 s

set

If you have to modify the second working setpoint value:

- during the first working setpoint modification
- press (▲) or (▲) set

within 2 s

- (3) you can set the first working setpoint between the limits you have set with the parameters rA1 and rA2
- (4) unless the parameter rA5 has value 0, you can not modify the first working setpoint
- (5) if the parameter -/0 has value 3, the second working setpoint will not be showed
- (7) unless the parameter rb5 has value 0, you can not modify the second working

4 **CONFIGURATION PARAMETERS**

Configuration parameters are arranged on two levels.

If you have to gain access the first level:

🔦 and 🖌 press

will show **P A**

for 4 s : the instrument

If you have to select a parameter:

If you have to modify the value of the parameter:

FK 401A **ON-OFF two outputs digital thermoregula-**

1 PREPARATIONS

1.1 How to install the instrument

Panel mounting, panel cut out 71 x 29 mm (2.79 x 1.14 in), with click brackets (they are supplied by the builder) or screw brackets (by request).

- (1) maximum depth with screw terminal blocks
- (2) maximum depth with extractable terminal blocks.

installation with click brackets (on the left-hand side, they are supplied by the builder)

 \sim

press (set)

- (6) you can set the second working setpoint between the limits you have set with

the parameters rb1 and rb2

setpoint

9 ELECTRICAL CONNECTION

9.1 Electrical connection

(19) provide the probe with a protection able to protect it against contacts with metal parts or use insulated probes.

| LABEL | MIN. | MAX. | U.M. | DEF. | SECOND ALARM |
|-------|------|------|----------------------|------|-----------------------------------------------------------------------------------------------|
| Ab0 | 0.1 | 999 | °C/°F ⁽⁸⁾ | 0.1 | hysteresis (differential, it is relative to Ab1, it is important if Ab4 \neq 1) |
| Ab1 | -99 | 999 | °C/°F ⁽⁸⁾ | 0.0 | second temperature alarm threshold (it is important if Ab4 \neq 1); look at Ab4 as well |
| Ab3 | 0 | 999 | min | 0 | second temperature alarm exclusion time since you turn the instrument ON (it is important |
| | | | | | if $Ab4 \neq 1$) |
| Ab4 | 1 | 7 | - | 1 | kind of temperature alarm (1 = it will never be activated, 2 = absolute lower temperature |
| | | | | | alarm, $3 = absolute$ upper temperature alarm, $4 = lower$ temperature alarm relative to the |
| | | | | | first working setpoint, 5 = upper temperature alarm relative to the first working setpoint, |
| | | | | | 6 = lower temperature alarm relative to the first working setpoint with automatic calculation |
| | | | | | and enabling, 7 = upper temperature alarm relative to the first working setpoint with auto- |
| | | | | | matic calculation and enabling) |

| LABEL | MIN. | MAX. | U.M. | DEF. | serial network (evcobus) |
|-------|------|------|------|------|----------------------------------------------------------------------------|
| L1 | 1 | 15 | _ | 1 | instrument address |
| L2 | 0 | 7 | _ | 0 | instrument group |
| L4 | 0 | 3 | _ | 1 | baud rate (0 = 1,200 baud, 1 = 2,400 baud, 2 = 4,800 baud, 3 = 9,600 baud) |

(8) the unit of measure depends on the parameter /8

(9) if the parameter -/0 has value 3, the parameter will not be showed

(10) if the parameter rA3 has value 0, you have to set the parameter rA0 with positive sign; if the parameter rA3 has value 1, you have to set the parameter rA0 with negative sign

(11) if the parameter -/0 has value 3, the parameter will set the neutral zone value

(12) if the parameter rb3 has value 0, you have to set the parameter rb0 with positive sign; if the parameter rb3 has value 1, you have to set the parameter rb0 with negative sign

(13) if the parameter has value 3, the load 1 will be ON when the room temperature will rise above the value "first working setpoint + rA0" and the load 2 will be ON when the

room temperature will fall below the value "first working setpoint - rA0" (the loads will be ON as long as the room temperature will get the first working setpoint)

(14) the value depends on the kind of measure input the instrument has been preset

(15) if the instrument has been preset for working with "J", "K" or "S" thermocouples, the parameter will not be showed

(16) unless the parameter /8 has value 1, the parameter will not be showed

(17) unless the instrument has been preset for working with 0-20 or 4-20 mA current transducers, the parameter will not be showed

(18) if the instrument has been preset for working with 0-20 or 4-20 mA current transducers, the parameter will not be important.

| AL I | the room temperature | test the temperature | no effect |
|------------|--------------------------|-------------------------|-----------|
| first | is outside the limit you | close to the probe | |
| tempera- | have set with the pa- | (look at the parameters | |
| ture alarm | rameter AA1 | AA0, AA1 and AA4) | |
| AL 2 | the room temperature | test the temperature | no effect |
| second | is outside the limit you | close to the probe | |
| tempera- | have set with the pa- | (look at the parameters | |
| ture alarm | rameter Ab1 | Ab0, Ab1 and Ab4) | |

The instrument shows the indications above alternated with the room temperature,

except the indications "E2", "E0" and "EOC" (they flash) and the buzzer (optional) utters an intermittent beep.

7 TECHNICAL DATA

7.1 Technical data

Box: self-extinguishing grey.

Size: $75 \times 33.5 \times 81 \text{ mm}$ (2.95 x 1.31 x 3.18 in) the model with extractable terminal blocks, $75 \times 33.5 \times 62 \text{ mm}$ (2.95 x 1.31 x 2.44 in) the model with screw terminal blocks. Installation: panel mounting, panel cut out $71 \times 29 \text{ mm}$ (2.79 x 1.14 in), with click brackets (they are supplied by the builder) or screw brackets (by request).

Frontal protection: IP 65.

Connections: extractable terminal blocks with pitch 5 mm (0.19 in) for cables up to 2.5 mm² (0.38 sq in, power supply, input and outputs) or screw terminal blocks with pitch 5 mm (0.19 in) for cables up to 2.5 mm² (0.38 sq in, power supply, input and outputs), 5 poles single line male connector with pitch 2.5 mm (0.09 in, serial port). **Ambient temperature:** from 0 to 55 °C (32 to 131 °F, 10 ... 90% of relative humidity without condensate).

Power supply: 12-24 Vac/dc, 50/60 Hz, 1.5 VA (standard model) or 12 Vac/dc, 50/60 Hz, 1.5 VA (by request).

Alarm buzzer: optional.

Measure inputs: 1 (room probe), depending on the model, for PTC or NTC probes, "J", "K" or "S" thermocouples, 2 or 3 wires Pt 100 or Ni 120 probes, 0-20 or 4-20 mA current transducers.

At terminal 12 there are 12 V you can use in order to supply the transducer.

Working range: from -50 to 150 °C (-58 to 302 °F) for PTC probe, from -40 to 110 °C

(40 to 230 °F) for NTC probe, from 0 to 700 °C (32 to 999 °F) for "J" thermocouple,

§ from 0 to 999 °C (32 to 999 °F) for "K" thermocouple, from 0 to 999 °C (32 to 999 °F) for

"S" thermocouple, from -50 to 600 °C (-58 to 999 °F) for 2 or 3 wires Pt 100 probe, from

-80 to 260 °C (-99 to 500 °F) for 2 or 3 wires Ni 120 probe.

Setpoint range: from -99 to 999 °C (-99 to 999 °F).

Resolution: 1 °F with unit of measure in Fahrenheit, 0.1 °C (except the instruments

preset for working with "J" , "K" or "S" thermocouples) or 1 °⊂ with unit of measure in

Celsius.

Display: one red LED 3-digit display 13.2 mm (0.51 in) high, output status indicators,

temperature unit of measure indicators.

Outputs: 2 relays: one 10 A @ 250 Vac relay for load 1 control (change-over contact)

and one 8 A @ 250 Vac relay for load 2 control (change-over contact).

Serial port: TTL with EVCOBUS communication protocol.
