

PREPARATIONS

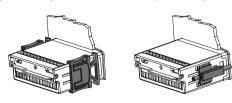

1.1 How to install the instrument

Panel mounting, panel cut out 71 x 29 mm (2.79×1.14 in), with click brackets (they are supplied by the builder) or screw brackets (by request).

(1) maximum depth with screw terminal blocks (by request)

(2) maximum depth with extractable terminal blocks (standard model).

installation with click brackets (on the left-hand side, they are supplied by the builder)

and screw brackets (on the right-hand side, by request); if you are using screw brackets, you have to moderate the clamping torque, in order not to damage the box and screw brackets.

OPERATION

2.1 Preliminary information

During the normal operation the instrument shows the process variable.

3 WORKING SETPOINT

3.1 How to set the working setpoint

If you have to modify the first working setpoint value:

■ press set

press

press

♠ or ◆

within 2 s

do not operate for 2 s

If you have to modify the second working setpoint value:

- press set
- setpoint modification

during the first working

- (*) or (*) within 2 s (5) (6) (7)
- press set
- [3] you can set the first working setpoint between the limits you have set with the parameters rA1 and rA2
- $(4) \qquad \hbox{unless the parameter rA5 has value 0, you can not modify the first working setpoint } \\$
- (5) if the parameter -/0 has value 3, the second working setpoint will not be showed
- (6) you can set the second working setpoint between the limits you have set with the parameters rb1 and rb2
- (7) unless the parameter rb5 has value 0, you can not modify the second working setpoint.

4 CONFIGURATION PARAMETERS

4.1 How to set the configuration parameters

Configuration parameters are arranged on two levels.

If you have to gain access the first level:

press

♠ and ◆

for 4 s $\widehat{)}$: the instrument

will show 🏳 🦰

If you have to select a parameter:

press

lacktriangledown or lacktriangledown

If you have to modify the value of the parameter:

- press
- set
- within 2 s

- press
- se

If you have to gain access the second level:

gain access the first level

♠ or ♠ for selecting PA press

press

within 2 s for setting press **↑** or **↓** "-19 "

press for 4 s : the instrument ♠ and ♠ press will show - -

If you have to quit the procedure:

♠ and ♠

for 4 s or do not operate for about 60 s.

SIGNALS

5.1 Signals

J.1 J.	3								
LED	MEANING								
out 1	Load 1 LED								
	if it is lighted, the load 1 will be ON								
	if it flashes, a load 1 delay will be running (look at the parameters CAO,								
	CA1, CA2 and CA4)								
out 2	Load 2 LED								
	if it is lighted, the load 2 will be ON								
	if it flashes, a load 2 delay will be running (look at the parameters Cb0,								
	Cb1, Cb2 and Cb4)								
%r.H.	Relative humidity LED								
	if it is lighted, the unit of measure of the process variable is relative hu-								
	midity								
bar	Bar LED								
	if it is lighted, the unit of measure of the process variable is bar								

INDICAT.	MEANING
	you can not modify the working setpoint (look at the parameters rA5
	and/or rb5)

The instrument shows the indications above alternated with the process variable, ex
cept the indications "E2", "E0" and "SAt" (they flash).

7 TECHNICAL DATA

7.1 Technical data

Box: self-extinguishing grey.

Size: $75 \times 33.5 \times 81$ mm (2.95 x 1.31 x 3.18 in) the model with extractable terminal blocks (standard model), $75 \times 33.5 \times 62$ mm (2.95 x 1.31 x 2.44 in) the model with screw terminal blocks (by request).

Installation: panel mounting, panel cut out 71 x 29 mm (2.79 x 1.14 in), with click brackets (they are supplied by the builder) or screw brackets (by request).

Frontal protection: IP 65.

Connections: extractable terminal blocks with pitch 5 mm (0.19 in, standard model) for cables up to 2.5 mm² (0.38 sq in, power supply, input and outputs) or screw terminal blocks with pitch 5 mm (0.19 in, by request) for cables up to 2.5 mm² (0.38 sq in, power supply, input and outputs), 5 poles single line male connector with pitch 2.5 mm (0.09 in, serial port).

Ambient temperature: from 0 to 55 $^{\circ}$ C (32 to 131 $^{\circ}$ F, 10 ... 90% of relative humidity without condensate).

Power supply: 230 Vac, 50/60 Hz, 1.5 VA (standard model) or 115 Vac, 50/60 Hz, 1.5 VA (by request).

Measure inputs: 1 (room probe) for 0-20 or 4-20 mA current transducers.

At terminal 6 there are 12 V you can use in order to supply the transducer.

Working range: configurable (it depends on the range of the transducer).

Setpoint range: from -99 to 999 %r.H./bar.

Resolution: 0.1 or 1 %r.H./bar.

Display: one red LED 3-digit display 13.2 mm (0.51 in) high, output status indicators, process variable unit of measure indicators.

Outputs: 2 relays: one 8 A @ 250 Vac relay for load 1 control (NO contact) and one 8 A @ 250 Vac relay for load 2 control (change-over contact).

Serial port: TTL with EVCOBUS communication protocol (for the configurer/cloner system CLONE and supervision system RICS).
