8 WORKING SETPOINT AND CONFIGURATION PARAMETERS

| 8 | .1 | Working setpoint | | | | | | |
|----|------|------------------|------|------|------|------------------|--|--|
| LA | ABEL | MIN. | MAX. | U.M. | DEF. | WORKING SETPOINT | | |
| | | -40 | 99 | °C | 2 | working setpoint | | |

8.2 Configuration parameters

| LABEL | MIN. | MAX. | U.M. | DEF. | MEASURE INPUTS | |
|-------|------|------|------|------|--|--|
| /1 | -55 | 99 | °C | 0 | cabinet probe calibration (you have to set eight points for adjusting one degree) | |
| /6 | -55 | 99 | °C | 0 | evaporator probe calibration (you have to set eight points for adjusting one degree) | |
| /A | 0 | 1 | - | 1 | evaporator probe presence (and its functions; $1 = YES$) ^{(4) (5)} | |

| LABEL | MIN. | MAX. | U.M. | DEF. | REGULATOR | |
|-------|------|------|------|------|---|--|
| rO | 1 | 15 | °C | 2 | hysteresis (differential, it is relative to the working setpoint) | |
| r3 | 0 | 1 | - | 0 | cooling or heating action (0 = cooling action) | |

| LABEL | MIN. | MAX. | U.M. | DEF. | COMPRESSOR PROTECTION | |
|-------|------|------|------|------|--|--|
| C0 | 0 | 240 | min | 0 | inimum delay between you turn the instrument ON and the first compressor activatio | |
| C1 | 0 | 240 | min | 5 | ninimum delay between two compressor activation in succession | |
| C2 | 0 | 240 | min | 3 | minimum delay between the compressor gets OFF and the following activation | |
| C6 | 0 | 100 | % | 0 | ercentage of cycle time the compressor is ON during the cabinet probe failure $^{(6)}$ | |

| LABEL | MIN. | MAX. | U.M. | DEF. | DEFROST | |
|-------|------|------|------|------|---|--|
| d0 | 0 | 99 | h | 8 | efrost interval (7) (0 = the defrost will never automatically be activated) | |
| d1 | 0 | 1 | | 0 | of defrost (0 = electric defrost, 1 = hot gas defrost) | |
| d2 | -55 | 99 | °C | 2 | frost end temperature (evaporator temperature, it is important if $/A = 1$) | |
| d3 | 0 | 99 | min | 30 | rost maximum length (0 = the defrost will never be activated) | |
| d6 | 0 | 1 | | 1 | eze of the temperature showed by the instrument during the defrost (1 = YES) $^{(8)}$ | |
| d7 | 0 | 15 | min | 2 | dripping time | |

once you have modified the value of the parameter, you will have to switch off the power supply of the instrument (4)

- (5) if the parameter has value 0, the defrost will end by time (parameter d3)
- the cycle time value is 20 min (6)
- unless the evaporator temperature is below the defrost end temperature you have set with the parameter d2, the defrost will not be activated (7)
- the instrument restores the normal operation once the dripping ends and the cabinet temperature gets the working setpoint. (8)

1 PREPARATIONS

1.1 How to install the instrument

Panel mounting, panel cut out 71 x 29 mm (2.79 x 1.14 in), with click brackets (they are supplied by the builder) or screw brackets (by request).

- (1) maximum depth with screw terminal blocks
- (2) maximum depth with extractable terminal blocks.

installation with click brackets (on the left-hand side, they are supplied by the builder)

and screw brackets (on the right-hand side, by request); if you are using screw brack-

ets, you have to moderate the clamping torque, in order not to damage the box and

screw brackets

1.2 Electrical connection

2 OPERATION

press

2.1 Preliminary information

During the normal operation the instrument shows the cabinet temperature.

2.2 How to activate the defrost by hand

If you have to activate the defrost by hand:

for 4 s (**)

Unless the evaporator temperature is below the defrost end tem-

perature you have set with the parameter d2, the defrost will not be activated.

WORKING SETPOINT 3

3.1 How to set the working setpoint

If you have to modify the working setpoint value:

(3) you can set the working setpoint between -40 and 99 °C (-40 and 99 °F).

4 **CONFIGURATION PARAMETERS**

4.1 How to set the configuration parameters

If you have to gain access the procedure:

for 4 s (***)and (

will show 4

If you have to select a parameter:

press (♠₩) or (♥)

press

If you have to modify the value of the parameter:

press (set)and(♠∰) or (♥)

If you have to quit the procedure:

| ♠ ∰and ↓ | for 4 s 🏹 or do not op |
|------------------------|------------------------|
| | erate for about 60 s. |

SIGNALS 5

press

| 5.1 Si | gnals | | | | | | | |
|--------|---|--|--|--|--|--|--|--|
| LED | MEANING | | | | | | | |
| * | Compressor LED | | | | | | | |
| | if it is lit, the compressor will be ON | | | | | | | |
| | if it flashes, a compressor delay will be running (look at the parameters | | | | | | | |
| | C0, C1 and C2) | | | | | | | |
| ₩ | Defrost LED | | | | | | | |
| | if it is lit, the defrost output will be activated | | | | | | | |
| | if it flashes: | | | | | | | |
| | - a defrost delay will be running (look at the parameters C0, C1 and C2) | | | | | | | |
| | 1 | | | | | | | |

• the dripping will be running (look at the parameter d7)

1

The instrument shows the indications above flashing.

7 **TECHNICAL DATA**

7.1 Technical data

Box: self-extinguishing grey.

Size: 75 x 33.5 x 62 mm (2.95 x 1.31 x 2.44 in) the model with screw terminal blocks, 75 x 33.5 x 81 mm (2.95 x 1.31 x 3.18 in) the model with extractable terminal blocks. Installation: panel mounting, panel cut out 71 x 29 mm (2.79 x 1.14 in), with click brackets (they are supplied by the builder) or screw brackets (by request).

Frontal protection: IP 65.

Connections: screw terminal blocks with pitch 5 mm (0.19 in) for cables up to 2.5 mm² (0.38 sq in, power supply, inputs and outputs) or extractable terminal blocks with pitch 5 mm (0.19 in) for cables up to 2.5 mm² (0.38 sq in, power supply, inputs and outputs). Ambient temperature: from 0 to 55 °C (32 to 131 °F, 10 ... 90% of relative humidity

without condensate).

Power supply: 12-24 Vac/dc, 50/60 Hz, 1.5 VA.

Measure inputs: 2 (cabinet and evaporator probe) for NTC probes.

Working range: from -40 to 99 °C (-40 to 210 °F).

Setpoint range: from -40 to 99 °C (-40 to 99 °F).

Resolution: 1 °C.

Display: one red LED 3-digit display 13.2 mm (0.51 in) high, output status indicators.

Outputs: 2 relays: one 10 A @ 250 Vac relay for one 1/2 HP @ 230 Vac compressor

control (NO contact) and one 8 A @ 250 Vac relay for defrost system control (change-

over contact); the maximum current allowed on terminal 2 is 10 A.

Kind of defrost: electric and hot gas defrost.

Defrost control: defrost interval, defrost end temperature and defrost maximum length (automatic and by hand).
